The right thing. The right place. The right time. The right cost.

Learn about logistics from the inside.

New Logistics and Supply Chain Certificates and degrees are offered through area community colleges, including Pima Community College, Cochise College and Arizona Western College where graduates are prepared for entry-level and front line supervisory positions.

How do I get started?

You can obtain an Associate Degree of Applied Science. In this program, you will learn the principles of supply chain management, inventory control, contracts, warehouse and transportation management, purchasing and international logistics. Internships are available through this program.

Alternatively, you can obtain basic and advanced certificates. In these programs, you will learn the principles of supply chain management, inventory control, computerized logistics and warehouse management.

These are new industry-driven programs due to the demand for workers in this industry in southern Arizona.

Courses are offered in eight-week programs with flexible scheduling availability.
